PROFESSIONAL SUMMARY

Highly analytical Full-Stack Software Engineer and University of Karachi Software Engineering graduate with specialized expertise in ASP.NET Core, C#, and React.js. Proven track record of architecting scalable web applications, engineering high-performance RESTful APIs, and executing advanced database optimizations to significantly reduce data retrieval latency. Experienced full-stack developer skilled at connecting reliable backend systems with great user experiences.

PROFESSIONAL EXPERIENCE

Frontend Web Developer

Sprint Digital

Aug 2025 – Present | Karachi, Pakistan.

- Engineer dynamic, highly interactive single-page applications using **React.js**, building out a scalable library of **30+ reusable UI components** that accelerated our development cycles by 25%.
- Build and deploy **5+** custom, fully responsive websites utilizing **WordPress** and **Elementor Pro**, implementing technical optimizations that improved average client **page-load speeds** by 40%.
- Translated complex **Figma prototypes** into high-performing frontend code to bridge the gap between **UI/UX** and engineering, consistently achieving 100% cross-browser compatibility across all devices.

Full Stack Developer

Bit Forge Labs

Jan 2025 – Jul 2025 | Karachi, Pakistan.

- Architected scalable backend solutions for **3 high-traffic web applications** using **ASP.NET Core**, supporting over **1,000+ daily active users** with **99.9%** uptime.
- Designed and implemented robust **RESTful APIs**, reducing API response time by **25%** through efficient SQL query indexing and caching strategies.
- Refactored legacy **React.js** components to implement lazy loading, decreasing initial bundle size by **40%** and accelerating rendering speed across devices.

EDUCATION

Bachelor of Science in Software Engineering

UBIT, DCS - University of Karachi

Feb 2022 – Jan 2026 | Karachi, Pakistan. | GPA: 3.1/4.0

Intermediate - Pre-Engineering

Jinnah Govt. College

2019 – 2021 | Karachi, Pakistan.

SKILLS

Languages: C#, Python, JavaScript, HTML5, CSS3

Frameworks & Libraries: ASP.NET Core (6/8) MVC, React.js, Next.js, Tailwind CSS, Bootstrap

Databases & Tools: MySQL, SQL Server, Git Version Control, RESTful APIs

CMS Platform: WordPress Elementor and Elementor Pro

Tools: Git Version Control, Visual Studio, VS Code, Cursor AI and Claude Code

PROJECTS

H-Manage Task Management WebApp

Leveraged Cursor AI and prompt-driven "vibe coding" to rapidly prototype a responsive Kanban SPA, directing high-level React.js logic to focus strictly on fluid, physics-based UX.

Orchestrated real-time Supabase synchronization and TanStack Query integration via AI-assisted development, accelerating the deployment of complex Optimistic UI patterns for zero-latency reordering.

Technologies: React.js, React DND, TanStack Query, Supabase
h-manage.altitudoquantinnovations.site

Library Management System

Built a robust MVC application for managing book inventories and tracking student issuance deadlines.

Designed specific user flows for administrators to issue books and for students to view borrowing history and return dates.

Technologies: ASP.NET Core 8 MVC, Entity Framework

Secure Personal Blog Platform

Programmed a secure blogging engine featuring full CRUD operations (Create, Read, Update, Delete) for content management.

Integrated Authentication & Authorization protocols to ensure only verified users can access administrative features.

Technologies: ASP.NET Core 8 MVC, Identity Framework

Mariani Metals Website

Engineered a high-performance, SEO-optimized corporate platform using Next.js and React.js, leveraging Static Site Generation (SSG) and Server-Side Rendering (SSR) to ensure rapid content delivery.

Created a dynamic Website allowing users to browse portfolios and the projects built by Mariani Metals and also showcasing their Services. Users can also view their policies and terms and conditions.

Technologies: React.js, Next.js, Tailwind CSS
mariani-six.vercel.app

Xpeed Prepaid Website

Developed a full-stack web application for Xpeed Prepaid, enabling users to access prepaid services through a seamless, end-to-end platform.

Utilized React for a dynamic frontend and an Express/Node.js backend, successfully managing serverless deployments, CORS middleware, and production database integrations.

Technologies: React, Tailwind CSS, Node.js, Express.js, MongoDB, Stripe
www.xpeedprepaid.com

IT Services Portal (Altitude Quant Innovations)

Developed a corporate service portal showcasing software solutions, enabling B2B clients to view service packages and initiate purchases.

Utilized React Components and Bootstrap grid systems to ensure a professional, mobile-responsive user interface.

Technologies: React.js, Bootstrap
altitude-quant-innovations.vercel.app

Gibson Supplies Website

Developed a responsive frontend interface for a building supplies company utilizing WordPress and Elementor Pro, ensuring seamless performance on both desktop and mobile.

Architected a streamlined user journey tailored for contractors, simplifying digital navigation for extensive product catalogs, custom delivery options, and bulk quote requests.

Technologies: WordPress Elementor Pro
